ABOUT

I'm a Software Engineer with 3 years of experience. Currently, I'm contributing to building SAAS for multiple large retail clients. I emphasize building efficient and sustainable software. I also value establishing positive relationships with coworkers and clients. I specialize in React and Python but am open to expanding my expertise in other domains.

EXPERIENCE

Software Engineer

Boston Consulting Group (BCG)
Feb 2022 – Present

- ‹› Built complex cross-browser functionalities that retrieve, compute, and save user data.
- ‹› Performed code reviews for dozens of engineers to ensure code meets infrastructure and code guidelines.
- ‹› Collaborated with other software engineers to implement and enhance complex features.
- ‹› Developed efficient and maintainable software to meet business objectives.

Software Engineer

Fast Enterprises
Aug 2019 – Oct 2020

- ‹› Collaborated with a 3rd party vendor to implement a system to process taxpayer data.
- ‹› Implemented an electronic filing service that processes tax returns.
- ‹› Proficiently troubleshoot simple and complex technological issues for different assigned projects.

Data Analyst

Fantasy Moguls
May 2018 - Jan 2019

- ‹› Analyze user spending habits and produced multiple reports to reveal popular spending habits.
- ‹› Built an automated process to retrieve the most up to date rosters.
- ‹› Retrieved professional athletes stats and computed their impact in game simulations.

App Developer

University of Montana School of Business
Sep 2019 – Oct 2020

- ‹› Designed and developed a Android app that collects student data through a friendly UI.
- ‹› Led multiple scrum meetings to stay aligned with management.
